

Smart Mobility Engineering Lab (IGS3231)

Jump Together, Fly Farther!

인하대학교 국제학부

Week 1 Lecture

**ISE Department
Prof. Mehdi Pirahandeh**

Content

- Welcome to Class
- Introduction to Smart Mobility Engineering Lab
- Q & A
- Survey

Professor Profile

Education

- Boras University, Sweden, Bachelor Degree in Computer and System Science
- Inha University, Integrated Master and PhD in Electronic Eng.

Experience

- Inha University, Research Professor in Big data and Intelligent Embedded system
 - Inha University in Tashkent, Teaching Professor
 - Inha University, Electronic Eng. Dep. , Invited Professor
 - Rep. of Korea National Research Foundation, Creative Research Principal Investigator
 - Inha University, ISE Dep. , Assistant Professor
-
- Office Hour: Book an appointment via email.
 - mehdi@inha.ac.kr

Introduction

- This course consists of multiple guided tutorials and lab sessions with increasing difficulty levels when working with an autonomous robot and machine learning.
- You learn how to set up such a TurtleBot3 from scratch using ROS/ROS2, how to interface the individual sensors and actuators, and finally, how to implement the practical projects.
- This course provides students with hands-on lab experience applying Ai and robot programming techniques for implementing the final autonomous robot projects.

Course Goals

- By participating in this course attendees will learn how to:
 - Practice ROS/ROS2 python/C++ client library: Creating your own ROS/2 C++/Python programs
 - Practice the recent simulating tool with ROS: RVIZ, RQT, Gazebo simulator
 - Familiarize the student with the recent machine learning project with ROS/ROS2
 - Familiarize the student with the recent Autonomous Vehicle project with ROS/ROS2

Course Oulines

- This course structure is outlined as follows,
 - I will notify the detailed class information in GitHub Repository, I-class system, and dedicated Kakao Group.
 - The student will present their projects and I will provide them with multiple feedback.
 - Blended Lecture and practice will be provided for students using a mix of offline classes, video content and online Zoom sessions.
 - There will be multiple tutoring sessions for helping students.

TurtleBot3

- 1. Overview
- 2. Features
- 3. Quick Start Guide
- 4. SLAM
- 5. Navigation
- 6. Simulation
- 7. Manipulation
- 8. Autonomous Driving
- 9. Machine Learning
- 10. Examples
- 11. Friends(Locomotion)
- 12. Learn
- 13. More Info
- 14. FAQ

3. Quick Start Guide

Watch on  YouTube

3. 1. PC Setup

WARNING: The contents in this chapter corresponds to the `Remote PC` (your desktop or laptop PC) which will control TurtleBot3. Do not apply this instruction to your TurtleBot3

Compatibility WARNING

- `Raspberry Pi 4` does not support ROS Kinetic.
- `Jetson Nano` does not support ROS Kinetic.

NOTE: This instruction was tested on Linux with `Ubuntu 16.04` and `ROS Kinetic Kame`.

3. 1. 1. Download and Install Ubuntu on PC

- Download the proper `Ubuntu 16.04 LTS Desktop` image for your PC from the links below.
 -  [Ubuntu 16.04 LTS Desktop image \(64-bit\)](#)
- Follow the instruction below to install Ubuntu on PC.
 - [Install Ubuntu desktop](#)

[Edit on GitHub](#)

You're reading the documentation for an older, but still supported, version of ROS 2. For information on the latest version, please have a look at [Humble](#).

ROS 2 Documentation

The Robot Operating System (ROS) is a set of software libraries and tools for building robot applications. From drivers and state-of-the-art algorithms to powerful developer tools, ROS has the open source tools you need for your next robotics project.

Since ROS was started in 2007, a lot has changed in the robotics and ROS community. The goal of the ROS 2 project is to adapt to these changes, leveraging what is great about ROS 1 and improving what isn't.

This site contains the documentation for ROS 2. If you are looking for ROS 1 documentation, check out the [ROS wiki](#).

If you use ROS 2 in your work, please see [Citations](#) to cite ROS 2.

Getting started

- [Installation](#)
 - Instructions to set up ROS 2 for the first time
- [Tutorials](#)
 - The best place to start for new users!
 - Hands-on sample projects that help you build a progression of necessary skills
- [How-to Guides](#)
